

Closed Loop (North America)

The Apricus Closed Loop Pump Station (CLPS) is designed to be used in residential solar thermal systems. All components were designed to streamline the installation process.

Key Features

- 3/4" copper with quick connect fittings
- Pre-plumbed and pre-wired
- Integrated flow setter
- Automatic air vent
- Expansion tank and connection kit
- Large temperature and pressure gauge
- Flanged circulator
- Differential controller
- Insulated EPP cover
