

Commercial Closed Loop (Nth Am)

The commercial pump station can be used in situations where the closed loop system has higher head and flow requirements. This pump station can be used with up to 10 x AP-30 collectors (2 banks of 5 AP-30).

Actual number of collectors may vary depending on flow rates, system components, etc.

Please contact your local Apricus representative for information on sizing.

Key Features

- Fully assembled closed loop pump station
- Pre-plumbed and pre-wired
- Standard 1" copper pipe sized connections
- Air separator and automatic air vent
- Combined temperature and pressure gauge
- Flanged circulator
